## CALL FOR PAPERS

Third Annual Carnegie Mellon Conference on the Electricity Industry:

## **Ensuring that the Industry Has the Physical and Human Resources Needed for the Next 30 Years**

**Tuesday-Wednesday, March 13 and 14, 2007**

The Third Annual Carnegie Mellon Conference has two themes:

Our first theme examines how to get an adequate amount of capacity of the right technologies for generation, transmission and distribution over the next three decades. Sub-themes are investment in a restructured world, addressing capacity markets, and ensuring that adequate capacity is always available. We welcome authors exploring both current schedule issues and investment issues.

For our second theme, we welcome authors exploring the current quantity and quality of undergraduate power engineering education. Contributors may explore paying for this education, what should be taught, and how to attract the most capable people. We also welcome contributions on MS and PhD level education and well as the training of skilled blue collar workers.

A conference registration fee will cover a reception on March 12, breakfast and lunch on the 13 and 14, and a reception and dinner on the 13. The registration fee is \$75 for individuals from University, government, and non-profit organizations and \$250 from individuals from for-profit organizations.

### TIMELINE:

**January 15, 2007** – Abstracts due

**February 15, 2007** – Notification of paper acceptance

**March 1, 2007** – Submit electronic versions of papers

**March 10, 2007** – Full papers due (optional)

### Please submit abstracts or questions to:

Professor Marija Ilic  
Departments of Electrical & Computer Engineering  
and Engineering & Public Policy  
[milic@ece.cmu.edu](mailto:milic@ece.cmu.edu)

and

Professor Lester Lave  
University Professor and J. Higgins Chair  
Tepper School of Business  
[lave@cmu.edu](mailto:lave@cmu.edu)
